

2007 Fall Equinox: September 23, 2007

By Barbara Hand-Clow

The Fall Equinox has arrived when we balance and harvest our Spring Equinox intentions, which have unfolded and launched new things during the summer. If you have been carefully nurturing these new creations for the last six months, you can easily balance them now; this releases their potency. We each came to Earth to create something special, and this potential emerges in the spring and becomes whole during the summer. Then like a gentle out-breath, these creations clarify in the fall. If you have been co-creating very intentionally during the last six months, it is time to find the fulcrum of the "teeter totter," the playground board that stretches out your creative intent. Your power exists on the balance point between the opposite ends! We lose energy when we're out on either end of the board; for example, when we constantly weigh our needs against the needs of others with whom we are in our relationship. This is the year of the advanced unifying synthesis of Day Five of the Galactic Underworld, when the threads leading to the next stage of evolution weave together. Amidst this great creation of the eighth Underworld, it has become critical to master the co-creative process with divine realms, and working with seasonality is the easiest way. The equinoxes and solstices ameliorate the high-frequency energy emanating from the Galactic Center, which helps you to accurately identify your desires (see *The Mayan Code: Time Acceleration and Awakening the World Mind* by Clow, and *The Mayan Calendar: Transformation of Consciousness* by Calleman for information about the Days and Nights of the various Underworlds).

To begin, what were your Spring Equinox intentions this year? How well have they been unfolding during this summer? And, once you have a sense of how they are working out, ask yourself: What are the unfinished parts that always arise when we are changing? What do you need to do during the next few months to securely locate yourself in the potent power point of the balance beam, the fulcrum? Once a new creation is perfectly balanced, it becomes a line of energy that stretches out into infinity and runs through all the other dimensions enfolding our solid world. You can think of this in terms of Superstring Theory and Brane worlds; we exist in the 3D Brane, photons are points of light in 3D that become long strings through all the other dimensions, connecting us to all that exists. Because of the density of our Brane, it has rare to fully balance new creations in 3D, but now the time has come to master this skill; the Galactic Center is blasting open access to the multidimensional strings. When you are balanced in this dimension while you create, you are in the Now, a subtle concept that many have alluded to. The easiest way to get there and stay there is by using the seasons, especially since Pluto on the Galactic Center is closely transiting the seasonal ingresses during 2006 through 2008. Time-access to the Now-is located in the Galactic Center, and we are moving into attunement with the Center. Each one of us needs to be in the Now while the other dimensions open in our world. So, work with me now.

Make sure you remember your intentions and then assess how you are doing with them. As you approach this new Equinox, are you staggering back and forth because you're adding new extraneous things, or are you struggling to stop a process that is already in gear that you think you didn't choose? The level of guidance from divine forces is so strong in our lives now that we're often not sure why we are doing things; we must surrender. Maybe you are leaning to one side or the other after you filled in some elements of a new creation? For example, let's say you decided to create a relationship with a partner who would be good at allowing you to pursue something that is very important to you right now. You've been exploring your creative pathway joyfully, and then during the summer you had a great time going deeper because there was no drain on your energy. But, meanwhile, you also wanted a partner. So where is your relationship at with this person right now? And what do you need to do to balance this relationship with your creative work, so that even more creativity will be possible this winter? When you start to feel things draining, stop to look and listen for a moment.

The "advanced unifying synthesis" is the main theme during 2007, and what each one of us decided to create this year will be our "freedom doorways" to experience our coming enlightenment during 2011! We are getting closer and closer to being liberated from old burdensome patterns left from the National Underworld (3116 BC-AD 2011) and the Planetary Underworld (AD 1755-AD 2011) that restrict the new accelerated patterns of galactic synthesis coming in through our lives. Many of us now understand that time acceleration is driving evolution; we realize that the divine plan is unfolding right on schedule and is coming right through our individual co-creations. We are the designers of the divine plan that exists within the mind of the universe, and using seasonality to create makes our individual work much more efficient.

This fall is an especially subtle and important moment, because the more we can totally balance what we are creating, the more we will fall into deep contemplation during the 2007 Winter Solstice; this will be ecstatic. This year (2007) has been a year of miracles, and the more we can see what is actually being accomplished, the more we will fall into rapture during deep winter. So, let us look at the astrology of the Fall Equinox chart for guidance in the balancing process.

The 2007 Fall Equinox chart is a power pack for accomplishing extraordinary manifestations, which is why I took so much space to prepare you for it. The Libra solar ingress is the top of a T-square coming from Mars in 27 Gemini opposite Pluto in 26 Sagittarius, which just went direct September 7 right on the Galactic Center. To imagine how the Equinox Sun is affected by its square to the Galactic Center conjunct Pluto, I would like to say a few things about astrophysics, which explains how intelligence comes to us from the Galactic Center. Many people are puzzled by the great Galactic Alignment of 1998 that I've written so much about in *The Alchemy of Nine Dimensions* and in *The Mayan Code*. Yet the principle is actually easy to understand.

The plane of the ecliptic-the Ecliptic-is where Earth and the other planets move around the Sun, and it is divided up into the Zodiac. The Milky Way Galaxy also has a plane where most of its stars are located, called the galactic plane. As our solar system orbits in the galactic plane around the Galactic Center, the Ecliptic bisects the galactic plane at a 61-degree angle. This is why the Star of David-six 60-degree angles-is a big archetype. Because of precession, which is created by the tilt of the Earth's axis, the location of the rising and setting Sun moves around the Zodiac in one full circle during 26,000 years. The closest alignment of the Winter Solstice Sun on the galactic plane's Ecliptic crossing was in 1998, and it is still very close now. This alignment caused significant changes in the physical processes of Earth (see *Alchemy of Nine Dimensions*) that made possible the radical time acceleration of the Galactic Underworld in January 1999.

I know that most of your brains are fogging right now, because my brain fogged plenty between 1994 through 2003 when I tried to really understand our relationship to the Milky Way Galaxy. All this is described in my books, and now it is time for more of you to comprehend these relationships. Why? Well, anyone who relates to these concepts is more open to the incredible energy coming from the Galactic Center. For the Cherokee/Maya people, the Galactic Center is the heart of the great mother, the birthing place for Earth, and the more we learn about the Black Hole at the Center, the more this ancient belief agrees with astrophysics. The reason I'm harping a bit is that I have been noticing something going on that can be very disorienting and chaotic: As the wave emanations from the Galactic Center increase, what is really in our minds is playing itself out right in front of our eyes like full-blown movies. This is occurring because the Galactic emanations are the pattern of Oneness that we are approaching, and Oneness sees no limitation to what you can create. As the old patterns that used to separate us weaken radically, the old protective layer keeping us from this power is searing away. So, look away from the old patterns-such as Bush waltzing around Iraq with a nutty look in his eyes while waving his right hand, just like Hitler did during WW II-and see instead the new patterns right under your nose, since they are coming right from your own mind!

Knowing how the center of the Galaxy influences us now, I can better interpret the T-square to the Fall Equinox Sun. Pluto has been intensifying the galactic activation during 2006-2009 because Pluto is stirring up the deepest, darkest, and most potent feelings that we are capable of holding. The Maya call the rift in our view of the galactic plane "Xbalba", which means the dark road, and it is just amazing to me that Pluto is located right on Xbalba at this time. It's as if he is a guide into the Galaxy as well as the underworld of Earth. It is as if Demeter, Persephone, and Pluto are all flying off into the center of the sky together on a magic carpet! Regarding this amazing T-square, Mars, the god of war in Gemini, is riling up all the thoughts in our minds as he opposes Pluto in Sagittarius on the Galactic Center; this tense opposition will amplify the galactic waves all fall and radically transmute the religions of the National Underworld.

This opposition also squares the Libra ingress, which sets up the absolute balance point for helping all of us to know we must withdraw our support for wars being fought in the name of God. Of course, as things go on Earth, this may trigger short-term breakouts of aggression, but the people of the world will greet these events with increasing levels of disgust. People will want to know why a regression to barbarity is happening, and they will not accept it.

Whatever is going on with the Global Elite will culminate on September 21, when Mars exactly opposes Pluto, the height of power distortions, aggressions, and their cleansing. This potent energy will fold into the Fall Equinox, helping to create patterns that will play out over the next three months. Mercury in 25 Libra closely trines Mars in Gemini and sextiles Pluto in Sagittarius, so perhaps some new and good ideas will come forth. Yet, this configuration could also signal that the Global Elite will conclude they can repair their weakening position by just using more sophisticated technology. The aspects to Jupiter are interesting, which I've been watching very closely because I'm sure we are in the early stages of a serious liquidity crisis. This monetary crisis may be the only thing that will stop the wars in Iraq and Afghanistan, and bring to an end "America as global empire." Jupiter in 13 Sagittarius squares Uranus in 16 Pisces, suggesting that quick changes in religious structures will cause financial panics. Since the Vatican is deeply involved in global finance, perhaps the Pope will be exposed in a banking crisis. Yet, Chiron/Moon/Neptune in Aquarius sextiling Jupiter suggests that these financial difficulties will be the source of physical, emotional, and spiritual healing. Chiron is the wounded healer, who inspires the most intense waking-up experiences in our lives, so this configuration suggests that financial stress will ultimately be a good thing. Of course, since we have the Moon with Chiron and Neptune, security of our homes is in question. Perhaps people will realize homes are to be lived in and not used as devices to make money? With Neptune in Aquarius close to Moon/Chiron, these experiences will be confusing in the short run, but illuminating over time.

Newly direct Venus in Leo is in close opposition to Neptune in Aquarius, which was exact September 21, the same day that Mars exactly opposes Pluto. Literally, those two oppositions will trigger events that will reverberate for three months, so watch for them and consider how they might affect your life. Venus opposite Neptune is the height of idealism and spiritual sensitivity, like an ascension experience during a Full Moon, and Mars opposite Pluto packs so much power, aggression, and depth that it can create and destroy worlds. Since we are in the middle of such rapid time acceleration, Mars opposite Pluto on the same day as Venus opposite Neptune may push neo-cons and evangelicals to the edge; they may reveal themselves in a way that will bring about their own destruction. They could hang themselves by their literal beliefs while the planet around them is inexorably expanding in the Galaxy. Be calm on September 21 and dump some old stuff that needs to go! Prepare yourself on September 21 for the Fall Equinox balancing to come in only two days. Remember, what is "out there" is passing, and what is within your heart is coming forth now.

Regarding the higher level of Mars opposite Pluto-the spiritual warrior-September 21 would be a great day to create the most exquisite spiritual vision of your life and then to imagine yourself defending it in Galactic councils!

The last aspect I'd like to take note of is Saturn approaching the South Node of the Moon in Virgo. First of all, Saturn went into Virgo on September 2, and we have entered into two and a half years of remembering how to be in the Now, and how to keep our houses in order. Saturn in Virgo is so calming after experiencing Saturn in Leo. Saturn on the South Node will flush out the old karmic patterns from people being over-controlled by too much patriarchy. Venus and Saturn will have their last conjunction in mid-October, when we may see the full scope of the financial crisis in housing. So, get your house in order, bury your freshly gathered nuts as the squirrels do, and prepare to hunker down into a long winter. We will move into Night Five of the Galactic Underworld in November, so it is still time to make some changes to prepare yourselves for the challenges ahead.
